About MD Purchase

Medical Device Purchase offers the best value in surgical products by providing premium quality instruments directly to doctors, hospitals, and eye clinics around the world. We offer a wide range of eye instruments, including top quality titanium and stainless steel instruments and a variety of sterilization products.

With over 20 years of experience manufacturing high quality ophthalmic microsurgical instruments, Medical Device Purchase has earned a reputation for personalized customer service. We ensure every product we sell is perfectly matched to our customers' specific requirements and specifications. We also develop and design new products in consultation with ophthalmologists in order to make them user-friendlier and meet the unique demands of each surgeon we supply.

Medical Device Purchase is a California based company serving customers across the United States and around the world, including medical schools, eye hospitals, naval medical centers, eye institutes, vitreous retinal centers, ophthalmologists, and optometry schools.

Manufacturing

Our instruments are manufactured overseas by our parent company, and they use surgical grade stainless steel and titanium imported from Germany. All Medical Device Purchase products are FDA approved, certified by ISO 9001-2000/2008 as well as ISO 13485, and meet the standards of the European Union's "CE Mark". Both Medical Device Purchase and its parent company are registered with the FDA.

Easy Ordering

Placing an order is easy with MDP. You may use our secure online shopping cart, or call us right over the phone. If you prefer, you may fax or email your order using our downloadable sales order form as well.

Delivery

If the product is in stock, you will receive your order in 1-7 business days depending upon shipping method. However, if the product is not in stock, you will receive your order in 10 business days. You will be kept informed as to the status of your order.

Disposable

Our disposable products come in individually vacuum-sealed packaging and are sterilized by ETO or gamma ray.

Optometry Students

MDP is proud to serve university optometry students and offers student pricing on both standard and deluxe foreign body removal kits. See page 35.

Titanium

Our titanium products are designed for durability, and they offer certain advantages over their stainless steel counterpart. See page 27 for details.

Instrument Care

- Please do not allow blood, tissue, or saline to dry on instruments.
- Never use saline for rinsing instruments, and use distilled water instead.
- Please do not use metal brushes or abrasive powders on the instruments.
- Do dry the instruments using lint-free cloth or a hot-air blower.
- Lubricate joints and box locks after cleaning.
- Always use protective covers for delicate tips.
- All instruments should be cleaned before being placed in sterilization tray.

Following these guidelines will help you get more life out of your investment.

Disposable Cannulas and Needles

Disposable Vidaurri Dual Extension Lasik Cannulas (6pk)

parallel cannulas with four ports simultaneously irrigating both sides of the lasik flap, 10mm angle, overall length 25mm

MPD 992

Disposable Hydrodissection Cannulas (6pk)

separates cortex from lens nucleus for easier phacoemulsification, 8mm flat tip

MPD 994-1 24g
MPD 994-2 25g
MPD 994-3 26g

Disposable Lacrimal Cannulas (6pk)

used for the irrigation and probing of the lacrimal duct

MPD 995-1 19g - Angled
MPD 995-2 19g - Straight
MPD 995-3 19g - Straight 2-Wall
MPD 995-4 23g - Angled
MPD 995-5 23g - Straight
MPD 995-6 23g - Straight 2-Wall

Disposable Rycroft Air Injection Cannulas (6pk)

45° angled, 7mm angled tip, overall length 22mm

MPD 996-1 23g
MPD 996-2 25g
MPD 996-3 27g
MPD 996-4 30g

Disposable Atkinson Retrobulbar Needles (6pk)

has flat bevel point without back or side bevels

MPD 998-1 23g
MPD 998-2 25g

Disposable Simcoe Irrigating/Aspirating Cannulas (6pk)

used to remove any cortical material left after phacoemulsification, has two ports: one for irrigation to maintain the anterior chamber and the other for aspiration, can also be used to remove viscoelastic material at the end of the surgery.

MPD 999-1 21g 0.50mm
MPD 999-2 22g 0.35mm
MPD 999-3 23g 0.30mm

Disposable Reverse Simcoe Irrigating/Aspirating Cannulas (6pk)

irrigation through the silicone tubing hub and aspiration through the needle or main hub

MPD 1000-1 21g 0.5mm
MPD 1000-2 22g 0.4mm
MPD 1000-3 23g 0.3mm

Disposable Simcoe Cortex Extractor Cannulas (6pk)

0.3mm side port, closed and sandblasted tip, curved shaft, 23 gauge

MPD 1003-1 13mm
MPD 1003-2 21mm

Disposable Anis Cortex Aspirating Cannulas (6pk)

closed tip with 0.4mm side port, finely sandblasted tip, 23 gauge

MPD 1006-1 Angled
MPD 1006-2 Straight

Disposable Cannulas and Needles continued...

Disposable Lewicky Anterior Chamber Maintainer Cannulas (6pk)

20 gauge x 3.5mm cannula, overall length 12mm, slightly roughened for self-retaining cannula, connected with 200mm long silicone tubing and adaptor

MPD 1008

Disposable Kratz Cystotome Cannulas 22g (6pk)

angled 60°, 12mm sharp tip, shaft overall length 13mm

MPD 1016

Disposable Cataract Sets

Disposable Cataract Sets

12 instruments

MPD 2207

1. MPD 705A - Disposable Kratz-Barraquer Wire Speculum (Adult)
2. MPD 732-1 - Disposable Blunt Chopper
3. MPD 738 - Disposable Sinsky Lens Manipulating Hook (Angled)
4. MPD 738B - Disposable Lester Lens Manipulating Hook (Angled)
5. MPD 862 - Disposable Kelman-McPherson Forceps
6. MPD 863 - Disposable Tennant Tying Forceps (Curved)
7. MPD 865 - Disposable Bonn Forceps
8. MPD 905 - Disposable Utrata Capsulorhexis Forceps
9. MPD 933 - Disposable Vannas Capsulotomy Scissors (Curved)
10. MPD 965 - Disposable Barraquer Micro Needle Holder (Micro without Lock)
11. MPD 994-1 - Disposable Hydrodissection Cannula
12. MPD 999-1 - Disposable Simcoe Irrigating Cannula

* All contents listed are sold in 6 packs outside of set

Disposable Eye Shields

Disposable Eye Shields (12pk)

fits left or right eye, soft contour for comfort
MPD 779

Disposable Forceps

Disposable Kelman-McPherson Forceps (6pk)

1x2 teeth, 7.5mm platform
MPD 862

Disposable Tennant Tying Forceps - Curved (6pk)

with guide pin, extra delicate and smooth jaws with 5mm long platform for 9-0 to 11-0 sutures

MPD 863

Disposable Bonn Forceps (6pk)

0.12mm 1 x 2 teeth, tying platform
MPD 865

Disposable Utrata Capsulorhexis Forceps (6pk)

very delicate grasping tips, extremely thin 11mm long straight shanks, with guide pin

MPD 905

Disposable Hooks and Nucleus Manipulators

Disposable Osher Y Hook No Hole Lens Manipulators (6pk)

primarily used for capturing haptics and centering the lens, tip width 0.6mm

MPD 736A

Disposable Sinskey II Lens Manipulating Hooks (6pk)

angled, used to dial the haptic into the capsular bag

MPD 738

Disposable Lewicky Lens Manipulating Hooks (6pk)

blunt tip, 0.15mm diameter, 10mm angled tip

MPD 738A

Disposable Lester Lens Manipulating Hooks (6pk)

angled, 0.44mm diameter

MPD 738B

Disposable Lacrimal Sets

Disposable Lacrimal Intubation Sets

comprised of two flexible stainless steel probes attached through a hollow medical grade silicone tube

MPD 1920

Disposable Needle Holders

Disposable Barraquer Needle Holders - Micro without Lock (6pk)

commonly used in the suturing of skin and the strabismus

MPD 965

Disposable Nucleus Choppers

Disposable Blunt Choppers (6pk)

packaged individually, blunt cutting edge
MPD 732-1

Disposable Sharp Choppers (6pk)

packaged individually, sharp cutting edge
MPD 732-2

Disposable Retractors

Disposable Iris Retractors (5pk)

flexible at the hook portion end with a sufficient stiffness added to a long leg of the hook, for ease of holding during insertion into the eye

MPD 112

Disposable Scissors

Disposable Vannas Capsulotomy Scissors - Curved (6pk)

small and slender spring-open scissors
MPD 933

Disposable Scleral Buckling Components

Disposable Silicone Bands (6pk)

MPD 240

Disposable Silicone Tires (6pk)

MPD 276

Disposable Small Incision Knives

Side Port (6pk)

making sclerocorneal "side port" (a secondary tunnel) tunnels in small incision cataract surgery

MPD 7001-1 15°

MPD 7001-2 30°

MPD 7001-3 45°

Phaco (6pk)

for phaco stab incision or entry into anterior chamber

MPD 7002-1 2.5mm

MPD 7002-2 2.8mm

MPD 7002-3 3.0mm

MPD 7002-4 3.2mm

Implant (6pk)

for I.O.L. implant incision or enlarging of slit

MPD 7003-1 4.0mm

MPD 7003-2 5.2mm

MPD 7003-3 6.2mm

Crescent (6pk)

for making a groove or tunnel

MPD 7004-1 Angled Bevel Up/Down

MPD 7004-2 Angled Double Bevel

MPD 7004-3 Straight Bevel Up/Down

MPD 7004-4 Straight Double Bevel

Disposable Small Incision Knives continued

2.8mm Angled 45° SC Clear Corneal (6pk)

for enlarging corneal slit

MPD 7005

MVR Angled 45° (6pk)

used for making incisions into the back of the eye to accommodate instruments

MPD 7006-1 19g

MPD 7006-2 20g

MPD 7006-3 23g

MVR Straight (6pk)

used for making incisions into the back of the eye to accommodate instruments

MPD 7007-1 19g

MPD 7007-2 20g

MPD 7007-3 23g

Disposable Small Incision Knife Tips

Side Port Tips (20pk)

MPD 1701-1 15°

MPD 1701-2 30°

MPD 1701-3 45°

Phaco Tips (20pk)

MPD 1702-1 2.5mm

MPD 1702-2 2.8mm

MPD 1702-3 3.0mm

MPD 1702-4 3.2mm

Implant Tips (20pk)

MPD 1703-1 4.0mm

MPD 1703-2 5.2mm

MPD 1703-3 6.2mm

Crescent Tips (20pk)

MPD 1704-1 Angled Bevel Up/Down

MPD 1704-2 Angled Double Bevel

MPD 1704-3 Straight Bevel Up/Down

MPD 1704-4 Straight Double Bevel

2.8mm Angled 45° SC Clear Corneal Tips (20pk)

MPD 1705

MVR Angled 45° Tips (20pk)

MPD 1706-1 19g

MPD 1706-2 20g

MPD 1706-3 23g

MVR Straight Tips (20pk)

MPD 1707-1 19g

MPD 1707-2 20g

MPD 1707-3 23g

Disposable Specula

Disposable Kratz-Barraquer Wire Specula - Adult (6pk)

open blades

MPD 705A

Disposable Trephines

Disposable Corneal Trephine Blades (6pk)

a ring shaped body with a center opening that is used to cut the cornea

MPD 803-1 6.0mm

MPD 803-2 6.5mm

MPD 803-3 7.0mm

MPD 803-4 7.5mm

MPD 803-5 8.0mm

MPD 803-6 8.5mm

MPD 803-7 9.0mm

MPD 803-8 9.5mm

Blade Breakers

Swiss Model Blade Breaker and Holder

spherical tip, used to break the disposable blade after use to prevent reuse

MP 970 12cm

Castroviejo Blade Breaker and Holder

with sliding lock, used to break the disposable blade after use to prevent reuse

MP 971-1 9cm
MP 971-2 12cm

Calipers

Castroviejo Caliper

used for making imprints on sclera, 20mm spread

MP 804-1 Curved
MP 804-2 Straight

Cannulas and Needles

Randolph Cyclodialysis Cannula

curved and spatulated tip, 13mm angled tip, overall length 29mm

MP 991-1 19g
MP 991-2 21g

Vidaurri Dual Extension Lasik Cannula

parallel cannulas with four ports simultaneously irrigating both sides of the lasik flap, angled 10mm, overall length 25mm, 25 gauge

MP 992

Rubenstein Lasik Irrigating Cannula

6 ports, 2mm wide, 4mm long, 14mm curved tip, overall length 31mm, 23 gauge

MP 993

Hydrodissection Cannula

separates cortex from lens nucleus for easier phacoemulsification, 8mm flat tip

MP 994-1 24g
MP 994-2 25g
MP 994-3 26g

Lacrimal Cannula

precision formed distal tip for minimal trauma, used for probing and irrigating lacrimal passage

MP 995-1 Angled 19g
MP 995-2 Straight 19g
MP 995-3 Straight 2-Wall 19g
MP 995-4 Angled 23g
MP 995-5 Straight 23g
MP 995-6 Straight 2-Wall 23g

Rycroft Air Injection Cannula

45° angled, 7mm angled tip, overall length 22mm

MP 996-1 23g
MP 996-2 25g
MP 996-3 27g
MP 996-4 30g

Gills-Welsh Olive Tip Cannula

angled 45°, 10mm angled tip, smooth and bulbous, overall length 26mm, 25 gauge

MP 997-1 Angled 45°
MP 997-2 Curved 45°
MP 997-3 Straight 45°

Atkinson Retrobulbar Needle

beveled and sharp rounded point, length 38mm

MP 998-1 23g
MP 998-2 25g

Simcoe Irrigating/Aspirating Cannula

used to remove any cortical material left after phacoemulsification, has two ports: one for irrigation to maintain the anterior chamber through the needle hub, and the tubing hub for aspiration, can also be used to remove viscoelastic material at the end of the surgery, overall length 16mm

MP 999-1 21g - 0.50mm
MP 999-2 22g - 0.35mm
MP 999-3 23g - 0.30mm

Cannulas and Needles continued...

Reverse Simcoe Irrigating/Aspirating Cannula

irrigation through the silicone tubing hub, and aspiration through the needle or main hub

- MP 1000-1 21g - 0.5mm
- MP 1000-2 22g - 0.4mm
- MP 1000-3 23g - 0.3mm

Simcoe Cortex Extractor Cannula

0.3mm side port, closed and sandblasted tip, curved shaft

- MP 1003-1 23g - 13mm
- MP 1003-2 23g - 21mm

Anis Cortex Aspirating Cannula

closed 0.4mm side port, finely sandblasted tip, 23 gauge

- MP 1006-1 Angled
- MP 1006-2 Straight

Lewicky Anterior Chamber Maintainer Cannula

20 gauge x 3.5mm cannula, overall length 12mm, slightly roughened for self-retention, connected with 200mm long silicone tubing and adaptor

- MP 1008

Gess Irrigating/Aspirating Cannula

for aspiration through silicone tubing and irrigation through main hub, J shaped front opening tip, supplied with silicone tubing and adaptor, 23 gauge

- MP 1010A-1 Left for 1 O'Clock
- MP 1010A-2 Right for 11 O'Clock

Kratz Cystotome Cannula

angled 60°, 12mm tip, sharp, 22 gauge, shaft overall length 13mm

- MP 1016

Bishop-Harmon Silicon Bulb Adaptor

- MP 1017

I've had the the opportunity to work with MD Purchase for the past two years and must say the service and support has been superb. The quality and precision of workmanship along with the pricing has given us the competitive edge we've needed to grow our business. Keep up the great work.

Dan Reberski
President
Star Ophthalmic Instruments, Inc

Corneal Markers

Thornton Optic Zone Marker

with centering pin, low profile

- MP 763-1 3.00mm
- MP 763-2 3.25mm
- MP 763-3 3.50mm
- MP 763-4 3.75mm
- MP 763-5 4.00mm
- MP 763-6 4.25mm
- MP 763-7 4.50mm
- MP 763-8 4.75mm
- MP 763-9 5.00mm

McDonald Optic Zone Marker

for photo refractive keratectomy, double-ended with extra fine cross-hairs

- MP 763A-1 6.5mm
- MP 763A-2 7.0mm

Osher-Neumann Radial Marker

with extra fine cross-hairs

- MP 763B-1 4 Blades
- MP 763B-2 6 Blades
- MP 763B-3 8 Blades
- MP 763B-4 10 Blades
- MP 763B-5 12 Blades
- MP 763B-6 16 Blades

Anis Suture Placement Marker

for corneal grafts with 8mm center opening

- MP 763C-1 8 Radial Blades
- MP 763C-2 12 Radial Blades

Curettes and Spoons

Wells Enucleation Spoon

15.2 cm with 21mm cup, operation room grade steel

MP 753

Meyerhoffer Chalazion Curette

flat handle, straight shaft

- MP 754-1 Size 0, 1.50mm
- MP 754-2 Size 1, 1.75mm
- MP 754-3 Size 2, 2.25mm
- MP 754-4 Size 3, 2.50mm
- MP 754-5 Size 4, 3.50mm

Bunge Evisceration Spoon

used to remove uveal tissue from scleral wall

- MP 754A-1 Small
- MP 754A-2 Large

Nightingale Capsule Polisher

used routinely in cataract and implant surgery, 1.75mm diameter, open ring, semi-sharp edge

MP 755

Fixation Rings

Thornton Globe Fixation Ring

multiple teeth 16mm, diameter ring with atraumatic teeth

MP 165A

Fine-Thornton Swivel Fixation Ring

corneal-incision fixation ring, swivel flat handle, 16mm diameter

MP 765

Forceps

Akahoshi Combo Prechopper Forceps

smooth, flattened, and pointed tips open to 3mm, straight round handle for cracking, dividing, and rotating the nucleus without sculpting

MP 816-1 Angled
MP 816-2 Straight

Vitreoretinal Forceps Straight

1x2 teeth, 20 gauge

MP 818-1 Serrated Jaws
MP 818-2 Smooth Jaws

Vitreoretinal Forceps with Platform

smooth jaws, 0.3mm platform, straight, 20 gauge

MP 821

Vitreoretinal Forceps Vertical Cut

smooth jaws, 20 gauge

MP 822

Halsted Mosquito Forceps

delicate, 5.25" (145mm) long, straight

MP 841-1 Curved
MP 841-2 Straight

Hartman Mosquito Forceps

extra delicate, 3.75" (95mm) long

MP 842-1 Curved
MP 842-2 Straight

Baby Jones Towel Clamp Forceps

cross-action, 2.25" (55mm) long

MP 844

Serrefine Forceps

serrated jaws, 1.5" (38mm) long, used to clip the suture to avoid entanglement with the other suture or tissues during operation

MP 845-1 Curved
MP 845-2 Straight

Eye Dressing Forceps

4" long, serrated tips, delicate

MP 849-1 Curved
MP 849-2 Straight

Bishop-Harmon Tissue Forceps

1x2 teeth, delicate

MP 852-1 0.3mm
MP 852-2 0.8mm

Gill-Hess Iris Forceps

2.75" (169.85mm) bayonet shafts with delicate 1 x 2 teeth, flat and serrated handle

MP 854

Bracken Fixation Forceps

straight shafts, delicate 0.7mm 1x2 teeth, flat and serrated handle

MP 856

Lester Fixation Forceps

straight shafts, fine teeth set at 90°

MP 857-1 1x2 Teeth
MP 857-2 2x3 Teeth

Osher Superior Rectus Forceps

0.5mm 1x2 teeth, angled shafts specially curved (to fit into the orbit of the eye) for catching hold of the muscle bellies of the intraorbital muscles and sutures

MP 859

Kelman-McPherson Forceps

7.5mm platform

MP 862-1 Smooth Jaws
MP 862-2 1x2 Teeth

Tennant Tying Forceps

with guide pin, extra delicate smooth jaws with 5mm long platform for 9-0 to 11-0 sutures

MP 863-1 Curved
MP 863-2 Straight

Forceps continued...

Jewelers' Forceps

fine pointed blades, used primarily to grasp tissues

MP 864-1 #1
MP 864-2 #3
MP 864-3 #3C

Jewelers' Forceps with Tying Platform

fine pointed blades, used primarily to grasp tissues

MP 864A

Jewelers' Forceps Angled 30°

fine pointed blades, used primarily to grasp tissues

MP 864 B

Bonn Forceps

0.12mm 1x2 teeth, tying platform

MP 865

McPherson Tissue Forceps

0.4mm 1x2 teeth, tying platform

MP 866-1 Curved
MP 866-2 Straight

Bores Fixation Forceps

0.12mm 1 x 2 teeth, 3mm spread

MP 867-1 Curved with Catch
MP 867-2 Straight with Catch

Kremer Corneal Fixation Forceps

with locked U shaped 13mm spread, 0.12mm 1x2 teeth each

MP 867A-1 Curved with Catch
MP 867A-2 Straight with Catch

Colibri Iris Forceps

very delicate, 0.12mm 1x2 teeth, tying platform - the teeth at the tip are ideal for holding the corneal or scleral edge when passing a suture; it can also be used for grasping iris tissue; in addition, there is a flat platform behind the tips which allows for suture-tying; the long and thin body also means that the surgical view is not obstructed during the surgery

MP 871

Botvin Iris Forceps

for peripheral iridectomies, serrated tips, 1x2 teeth

MP 871A

Gill-Colibri Iris Forceps

very fine pointed tips with tying platform

MP 871B

Polack-Colibri Forceps

double teeth

MP 872

Castroviejo-Colibri Forceps

very delicate, 0.12mm 1x2 teeth, the teeth are forward-angled for easy grasping and manipulation of tissues

MP 872A

Castroviejo Corneal Suturing Forceps

1x2 teeth with tying platform

MP 872B-1 0.12mm
MP 872B-2 0.30mm
MP 872B-3 0.50mm
MP 872B-4 0.90mm
MP 872B-5 1.50mm

Girard Corneoscleral Forceps

1x2 teeth with tying platform

MP 874-1 0.12mm
MP 874-2 0.30mm

Barraquer Cilia Forceps

overall length 103mm, slightly angled, smooth jaws

MP 878

Forceps continued...

Beer Cilia Forceps

4mm wide, smooth jaws
MP 879

Douglas Cilia Forceps

thin tips, 2.5mm wide with horizontal serrations, flat handle
MP 879A

Arruga Capsule Forceps

curved shafts with 2mm cup jaws, narrow, serrated handle
MP 881-1 Angled
MP 881-2 Curved

Jameson Muscle Forceps

angled shafts with 12mm scaled jaws, 1mm teeth on one jaw fit into holes on the other jaw, slide lock and serrated handle

MP 884-1 - Left, Child 4 Teeth
MP 884-2 - Right, Child 4 Teeth
MP 884-3 - Left, Adult 6 Teeth
MP 884-4 - Right, Adult 6 Teeth

Berke Ptosis Forceps

multi-curved shafts (with straight blades and longitudinal serrations), slide lock, and serrated handle
MP 885

Snellen Entropium Forceps

designed to guard the globe when making a full thickness eyelid incision, has the added advantage of controlling haemorrhage when compared with the eye guard above

MP 886-1 Left, Adult
MP 886-2 Right, Adult

Lambert Chalazion Forceps

stops bleeding as well as provides a rigid surface against which the cyst can be incised
MP 887

Desmarres Chalazion Forceps

solid lower plate, open upper plate, locking thumb screw mechanism
MP 888-1 13mm
MP 888-2 20mm

Erhardt Lid Forceps

14mm solid, oval lower plate and 9mm straight, serrated upper jaw
MP 889

Hunt Chalazion Forceps

solid and round lower plate, open upper plate with 12mm diameter inside
MP 890

Shepard Lens Forceps

gently curved shafts, serrated jaws, 108mm long
MP 891

Shepard Lens Holding Forceps

with serrated lower jaw, curved shanks
MP 891A

Clayman Lens Holding Forceps

gently curved, delicate, angled 70°, 3mm jaws
MP 892

Blaydes Lens Holding Forceps

very delicate, narrow and smooth jaws, angled 45°, overall length 110mm
MP 894

Forceps continued...

Faulkner Lens Holding Forceps

with smooth and polished jaws, used to pick up foldable IOL from case without marking or damaging the lens

MP 895

Buratto Lasik Flap Forceps

serrated and abrasive blasted inner tip

MP 903

Utrata Capsulorhexis Forceps

very delicate grasping tips, and extremely thin 11mm long straight shanks, with guide pin

MP 905

Masket Capsulorhexis Forceps

iris stop platform, 8.5mm tip, curved shanks, with guide pin

MP 905B

Jaffe Capsulorhexis Forceps

very delicate round grasping tips, extremely thin 11mm long shanks

MP 905D

Kraff Capsule Tag Forceps

11mm long jaws with 1.5mm long and smooth platform at tips; recessed inside jaw surfaces prevent inadvertent iris pickup

MP 906

Pierse Type Micro Forceps

the tips have an opposing flat surface, which causes less trauma

MP 908-1 0.2mm

MP 908-2 1.5mm

Universal Lens Folding Forceps

designed to fold the lens at right angle and implant it into the capsular bag

MP 913

Kratz Lens Holding Forceps

with smooth and curved jaws, very delicate

MP 899

Inamura Capsulorhexis Forceps

12.1cm, delicate tapered shanks to seal incision

MP 904

Utrata Capsulorhexis Forceps

round handle, tip length 11mm, 45 degree angle iris stop platform, 8.5mm tip straight shanks, round handle, with guide pin

MP 905A

Neyvas Capsulorhexis Forceps

extremely thin 11mm long shanks, cystotome shaped tips for penetrating and grasping anterior capsule

MP 905C

Utrata-Kershner Capsulorhexis Forceps

short handle, 23 gauge

MP 905E

Pierse Corneal Forceps

0.1mm diameter, straight, delicate, 115mm length

MP 907

McPherson Bipolar Forceps

delicate tips for precise coagulation

MP 911-1 Angled

MP 911-2 Straight

Universal Lens Inserting Forceps

ideal for silicone and acrylic foldable IOLs, box model smooth and curved jaws with rounded edges grip the lens gently and firmly

MP 914

Handles

Bard-Parker Handle

a metal handle with a patent form of attachment for blades
 MP 773-1 Flat Handle, #3
 MP 773-2 Round Handle, #9

Irrigating Handle

9.3cm long
 MP 1009

Bimanual Aspiration Handpiece

lightweight autoclavable tip, 0.3mm aspiration port
 MP 1012 Aspirating Hand Piece

Chuck Handle

for holding micro blades
 MP 782-1 7.5cm
 MP 782-2 10cm

Bimanual Irrigation Handpiece

lightweight autoclavable tip, two irrigating ports
 MP 1011 Irrigating Hand Piece

Hooks and Nucleus Manipulators

Guthrie Fixation Hook

sharp and fully curved tips
 MP 729-1 1.5mm
 MP 729-2 2mm

Bechert Nucleus Rotator

blunt forked tip, angle to tip 7mm, tip width 0.7mm
 MP 736

Jaffe-Bechert Nucleus Rotator

blunt forked tip, angle to tip 9mm, tip width 0.70mm
 MP 736B

Kuglen Iris Hook and Lens Manipulator

push and pull model, tip width 0.80mm
 MP 737-1 Angled
 MP 737-2 Straight

Sinsky II Lens Manipulating Hook

used for dialing the haptic into the capsular bag
 MP 738-1 Angled
 MP 738-2 Straight

Fenzl Lens Manipulating Hook

blunt tip, 0.15mm diameter
 MP 739

Jameson Muscle Hook

used for retrieving the rectus muscles at their insertion sites
 MP 744

Barrett Duo Axe with Mushroom Rotator

designed to produce a quick vertical crack of the nucleus during phacoemulsification
 MP 731C

Osher Y Hook No Hole Lens Manipulator

primarily used for capturing haptics and centering the lens, tip width 0.6mm
 MP 736A

Rosen Phaco Splitter and Y Rotator

double-ended
 MP 736C

Kuglen Iris Hook and Lens Manipulator

clover leaf model
 MP 737A

Lewicky Lens Manipulating Hook

blunt tip, 0.15mm diameter, 10mm angled tip
 MP 738A

Smith Expressor Hook

11.5mm hook, flat handle
 MP 743

Green Muscle Hook

2mm tip width, overall length 127mm
 MP 744A

Hooks and Nucleus Manipulators continued...

Graefe Muscle Hook

used for isolating the belly of inferior oblique, overall length 131mm
MP 745

Stevens Tenotomy Hook

12.7cm, 5mm hook
MP 745A

Gass Retinal Detachment Hook

flattened 13mm "Graefe type" hook with 1.5mm oval hole
MP 745B

Akahoshi Nucleus Sustainer

a companion instrument for Akahoshi Phaco Prechopper
MP 777

Tennant Nucleus Manipulator

features a .37mm ball shaped tip for rotation
MP 777A

Knives and Dissectors

Von Graefe Cataract Knife

used for cutting out of the anterior chamber from the inside through the limbus
MP 791

Ziegler Knife

used for opening the capsule of the lens of the eye and disrupting the lens material before aspirating
MP 794

Tooke Corneal Knife

making sclerocorneal tunnels in small incision cataract surgery and keratoplasty
MP 796

Gill Corneal Knife

curved cutting edge, straight
MP 797

Lacrimal Instruments

Harms Trabeculotomy Probe

used for penetrating the Schlemm's canal
MP 767-1 Left
MP 767-2 Right

Bowman Lacrimal Probe

helps to identify the exact location of the lacrimal fundus and facilitate dissection of the lacrimal sac
MP 768-1 Size 0000 & 000
MP 768-2 Size 000 & 00
MP 768-3 Size 00 & 0
MP 768-4 Size 1 & 2

Wilder Lacrimal Dilator

blunt forked tip, angle to tip 7mm, tip width 0.7mm
MP 769A-1 Size 1, Fine Taper
MP 769A-2 Size 2, Medium Taper
MP 769A-3 Size 3, Heavy Taper

Castroviejo Lacrimal Dilator

double-ended, fine and medium taper
MP 769B

Pigtail Probe

with suture holes for lower punctum and upper punctum
MP 771

D.C.R. Mallet

lead filled, stainless steel head
MP 772

West Lacrimal Chisel

straight blade, 5mm wide
MP 809-1 Curved
MP 809-2 Straight

Lasik Instruments

Katzen Lasik Flap Unzipper

double-ended, combines a modified Sinsky Hook and a bi-convex spatula with beveled notches
MP 781

Lens Loops and Dividers

Kirby Hook & Lens Loop

hook is used to put pressure on the lens, the loop is placed on the anterior chamber to "catch" the lens
MP 743B

Wilder Lens Loop

13.3cm, 5.5 x 8mm loop
MP 751

Kansas Lens Loop

3mm wide, serrated for small incision nucleus fragment removal
MP 751A

Lewis Lens Loop

smooth loop
MP 752-1 Small - 5 x 6mm
MP 752-2 Large - 6 x 7mm

Needle Holders

Kalt Needle Holder

has a locking mechanism to secure the needle during suturing
MP 951-1 Curved
MP 951-2 Straight

Castroviejo Needle Holder Standard Jaws

standard jaws, ideal for 4-0 to 7-0 sutures
MP 956-1 Curved with Lock
MP 956-2 Curved without Lock
MP 956-3 Straight with Lock
MP 956-4 Straight without lock

Castroviejo Needle Holder Delicate Jaws

delicate jaws, ideal for 7-0 to 9-0 sutures
MP 957-1 Curved with Lock
MP 957-2 Curved without Lock
MP 957-3 Straight with Lock
MP 957-4 Straight without Lock

McPherson Needle Holder Very Delicate Jaws

very delicate jaws
MP 959-1 Curved with Lock
MP 959-2 Curved without Lock
MP 959-3 Straight with Lock
MP 959-4 Straight without Lock

Barraquer Needle Holder Very Delicate Jaws

commonly used in the suturing of skin and for strabismus, very delicate jaws, ideal for 8-0 to 11-0 sutures
MP 963-1 Curved with Lock
MP 963-2 Curved without Lock
MP 963-3 Straight with Lock
MP 963-4 Straight without Lock

Barraquer Needle Holder Short Very Delicate Jaws

short model, very delicate jaws
MP 964-1 Curved with Lock
MP 964-2 Curved without Lock

Needle Holders continued...

Barraquer Needle Holder Short Micro Jaws

short model with micro jaws, ideal for 10-0 to 11-0 sutures

- MP 965-1 Micro with Lock
- MP 965-2 Micro without Lock

Barraquer Needle Holder Extra Delicate Micro Jaws

extra delicate micro jaws, ideal for 10-0 to 11-0 sutures

- MP 966-1 Micro with Lock
- MP 966-2 Micro without Lock

Nucleus Choppers

Kansas Nucleus Trisector

nucleus trisector for manual small incision surgery, 4mm wide

- MP 726-1 Left
- MP 726-2 Right

Kansas Nucleus Bisector

for manual small incision surgery

- MP 727

Agarwal Phaco Chopper

double-ended, full cutting edge and Y rotator

- MP 731B

Chang Combination Chopper

this double-ended instrument features micro finger and pointed "quick chop" tip

- MP 731D

Nagahara Karate Chopper

tip length 1.5mm, spear-shaped for ease of insertion into the nucleus

- MP 731E

Rosen Phaco Splitter

0.25mm blunt polished tip

- MP 733-1 1mm cutting edge
- MP 733-2 1.5mm cutting edge

Kansas Nucleus Vectis Solid

used as a "cutting block" for Kansas Nucleus Bisector and Trisector

- MP 747

Punches and Ronguers

Citelli Bone Nibbling Ronguer

7mm opening, 2mm wide

- MP 806

Kerrison Bone Nibbling Ronguer

used to enlarge the osteotomy, comes in different sizes, and can be up-biting (as shown here) or down-biting; the blunt tip of the rongeur is placed against the nasal mucosa and rotated, dissecting the nasal mucosa from the underlying bone, which allows the cutting edge to slip behind the bone without damaging the nasal mucosa

- MP 807-1 Size 0, 1mm wide
- MP 807-2 Size 1, 2mm wide
- MP 807-3 Size 2, 3mm wide
- MP 807-4 Size 3, 4mm wide
- MP 807-5 Size 4, 5mm wide

Beyer Ronguer

used to remove the spine of bone present between the nasal mucosa and the nasolacrimal duct

- MP 808

Punches and Ronguers continued...

Holth Corneoscleral Punch

horizontal punch designed to produce a clean hole without tissue tags

- MP 811-1 1mm
- MP 811-2 1.5mm
- MP 811-3 2mm

Gass Corneoscleral Punch

vertical punch designed to produce a clean hole without tissue tags

- MP 812

Kelly Descemet Punch

used to create a trap door after making a scleral flap

- MP 813

Retractors

Stevenson Lacrimal Sac Retractor

self-retaining adjustable spread

- MP 113A 3x3 Blunt Prongs

Stevenson Lacrimal Sac Retractor Solid Blade

self-retaining adjustable spread

- MP 113B

Mueller's Lacrimal Sac Retractor

3x3 sharp prongs

- MP 713

Desmarres Lid Retractor Solid Blade

used primarily for keeping the eyelid (especially the upper lid) everted, in the upper lid it is used for the posterior approach in ptosis repair and mullerectomy for upper lid retraction; in the lower lid it can be used to keep the lid everted when performing fat excision or repair of lower lid retraction in thyroid eye disease

- MP 721-1 9MM
- MP 721-2 11MM
- MP 721-3 13MM
- MP 721-4 15MM
- MP 721-5 17MM

Desmarres Lid Retractor Double-Ended

9mm/13mm

- MP 721A

Jaffe Wire Lid Retractor

clamps to surgical drape with suture or elastic band

- MP 723

Jaeger Lid Plate

protects the cornea and globe when performing eyelid procedures

- MP 724

Knapp Lacrimal Sac Retractor

4mm long x 8mm wide, sharp, 4-prong tip, flat handle

- MP 740

Scissors

Micro Iris Scissors

delicate pointed tips, ring handle, 3.5" length
 MP 921-1 Curved
 MP 921-2 Straight

Strabismus Scissors

designed to cut the extraocular muscles during ophthalmic procedures such as strabismus
 MP 922-1 Curved
 MP 922-2 Straight

IOL Cutters

designed for soft IOL cutting
 MP 926-1 Angled
 MP 926-2 Straight

Stevens Tenotomy Scissors

blunt tips, ring handle, curved
 MP 927-1 Curved
 MP 927-2 Straight

Gills-Welsh-Vannas Micro Scissors

11mm blades with sharp and pointed tips, flat serrated handle
 MP 928

Enucleation Scissors

allows easy insertion around the globe to cut the connective tissue and the optic nerve
 MP 929-1 Medium Curve
 MP 929-2 Strong Curve
 MP 929-3 Straight

Dewecker Iris Scissors

a small scissors with sharp points for intraocular cutting of the iris and lens capsule
 MP 930-1 Blunt-Blunt
 MP 930-2 Sharp-Blunt
 MP 930-3 Sharp-Sharp

Micro Iris Scissors

straight and pointed tips, 8mm blades
 MP 931

Barraquer Iris Scissors

used to cut the iris during peripheral iridectomy
 MP 932

Vannas Capsulotomy Scissors

small and slender spring-open scissors for intraocular maneuvers, has two wings to operate it: one sharp and one blunt blade
 MP 933-1 Curved
 MP 933-2 Straight

Vannas Capsulotomy Scissors

small and slender spring-open scissors for intraocular maneuvers, has two wings to operate it: one sharp and one blunt blade
 MP 934 11mm Blades

Stern-Gills Capsulotomy Scissors

extra thin 10mm long blades
 MP 936

Westcott Tenotomy Scissors

curved and blunt tips allow easy dissection of the Tenon's capsule from the sclera with little risk of perforating the scleral wall
 MP 938-1 Left
 MP 938-2 Right

Scissors continued...

McPherson-Westcott Stitch Scissors

very sharp pointed tips, small blades

MP 939

Castroviejo Keratoplasty Scissors

angled to side blunt tips, small blades

MP 940

Castroviejo Corneal Scissors

spring-open scissors used to cut the external side of the cornea, fine sutures, iris, etc.

MP 941-1 11mm Small Blades

MP 941-2 16mm Medium Blades

Castroviejo Micro Corneal Scissors

curved pointed tips, small blades, 12mm blade length

MP 942

Castroviejo Corneoscleral Scissors

curved, small blades

MP 943-1 Left

MP 943-2 Right

Intraocular Scissors

squeeze handle, protective cap, used to cut capsular tags - 17 gauge

MP 945-1 Curved

MP 945-2 Straight

Vitrectomy Scissors Angled Jaws

designed for partial excision of vitreous tissue - 20 gauge

MP 946-1 30°

MP 946-2 45°

Vitrectomy Scissors Vertical Cut

designed for partial excision of vitreous tissue - 20 gauge

MP 947-1 80°

MP 947-2 90°

Scleral Depressors

Schepens Scleral Depressor

4mm long x 8mm wide, sharp, 4-prong tip, flat handle

MP 707-1 Small

MP 707-2 Medium

MP 707-3 Large

Schocket Scleral Depressor

designed to displace the sclera by compression, facilitating the examination of surrounding tissue, double-ended with pocket clip

MP 707A

Spatulas

Castroviejo Cyclodialysis Spatula

double-ended, serrated handle

MPT 750-1 0.25mm

MPT 750-2 0.5mm

Culler Iris Spatula

used for repositioning an iris that has prolapsed through a wound, 1mm blade

MP 758A

Barraquer Iris Spatula

used for repositioning an iris that has prolapsed through a wound, round handle, smooth, angled

MP 758B

Troutman Barraquer Iris Spatula

used for repositioning an iris that has prolapsed through a wound, 15mm angled tip, tip width 0.5mm

MP 758C

Spatulas continued...

Green Spatula
double-ended, long handle
 MP 760

Fukasaku Lasik Spatula
for lifting and dissecting the corneal flap
 MP 780

Specula

Clark Eye Speculum
open blades
 MP 701

Williams Eye Speculum
fenestrated blades
 MP 701A

Weiss Eye Speculum
fenestrated blades
 MP 701B

Lancaster Eye Speculum
solid blades
 MP 701C

Sauer Lid Speculum
solid blades
 MP 703-1 Premature Infant
 MP 703-2 Infant
 MP 703-3 Child

Cook Eye Speculum
with locking screw
 MP 703A-1 Small
 MP 703A-2 Medium
 MP 703A-3 Large

Murdoch Eye Speculum
fenestrated with locking screw
 MP 703B-1 Small
 MP 703B-2 Medium
 MP 703B-3 Large

Barraquer Wire Speculum with Fenestrated Blades
the most widely used speculum for cataract extraction especially during phacoemulsification
 MP 704-1 Child (10mm)
 MP 704-2 Adult (15mm)

Barraquer Lid Speculum with Solid Blades
solid blades, temporal approach
 MP 705-1 Child (10mm)
 MP 705-2 Adult (15mm)

Kratz-Barraquer Wire Speculum
open blades
 MP 705A-1 Child (13mm standard wire)
 MP 705A-2 Adult (15mm standard wire)

Infant Wire Speculum
4mm wide blades
 MP 705C

McIntyre Wire Speculum "V" Shaped Blades
with gently curved springs and V shaped blades
 MP 705D

Specula continued...

Grandon-Barraquer Wire Speculum

with suture notches or holes to obtain additional traction for upper eyelid

MP 705F

Maumenee-Park Eye Speculum

with canthus hook and blade locking screw

MP 711

Fishkind Castroviejo Lid Speculum

open blades for phaco, adjustable mechanism

MP 712A

Lieberman Eye Speculum

solid blades for temporal placement, adjustable mechanism, non-reflective finish

MP 715

Lieberman Speculum

15mm blades and six ports for temporal approach

MP 1015A

McPherson Eye Speculum

solid blades with vertical suture posts

MP 710A

Castroviejo Eye Speculum

fenestrated blades

MP 712

Lieberman-Tennant Eye Speculum

open blades for temporal placement, adjustable mechanism

MP 714

Lieberman Wire Aspirating Speculum

'V' Shaped 15mm blades, six ports to remove excess fluid from surgical area

MP 1015

Spuds

Ellis Foreign Body Spud

small and curved, 1mm rounded blade, flat handle

MP 799

Spoon Spud

scoop-like tip for removing foreign bodies

MP 799S-1 Angled
MP 799S-2 Straight

Golf Club Spud

golf club-shaped tip with sharp edge, flat handle

MP 799G

Spud and Gouge

in reversible handle

MP 800

Trephines and Graft Holders

Elliot Scleral Trephine

used in corneal donation (eye donation) to cut out the cornea in a circular fashion

- MP 801-1 1mm
- MP 801-2 1.5mm
- MP 801-3 2mm

Castroviejo Corneal Trephine

used in corneal donation (eye donation) to cut out the cornea in a circular fashion

- MP 802-1 5mm
- MP 802-2 5.5mm
- MP 802-3 6mm
- MP 802-4 6.5mm
- MP 802-5 7mm
- MP 802-6 7.5mm
- MP 802-7 8mm
- MP 802-8 8.5mm
- MP 802-9 9mm
- MP 802-10 9.5mm
- MP 802-11 10mm
- MP 802-12 10.5mm
- MP 802-13 11mm

Arruga Lacrimal Trephine

facilitates treatment of obstructions of the common canaliculus or the internal canalicular punctum

- MP 814-1 (with center pin)
- MP 814-2 (without center pin)

I received the items I ordered. The items were exactly what I needed. I am very happy with my purchase and look forward to future business interactions.

*Marjorie Rico, MD, PhD
Administrative Chief Resident, Ophthalmology
SUNY Downstate Medical Center*

Advantages of Titanium

Titanium is much stronger than stainless steel, which makes it longer lasting.

Lightweight (typically 45% lighter)

- Improved feel at the tip providing better control, maneuverability, and flexibility
- Reduced surgeon fatigue after a full day of surgery
- Strength to weight rated 3x stainless steel
- Less prone to damage when dropped

Blue Color

- Easy on the eyes – not reflective like high polished stainless steel
- High contrast against red reflex

Heat Tolerance

- Titanium has an impressive heat tolerance of up to 824° F, enabling excellent heat sterilization with existing autoclave methods

Rust Proof

- Titanium is totally non-corrosive when exposed to oxidizing acids, alkalis, saltwater, laboratory saline solutions, blood, and other bodily fluids
- Titanium does not contain iron making it impervious to rust. Even when added to a tray full of rusting instruments, they will never rust. Guaranteed for life!

Non-Magnetic

- Will not stick to or attract other instruments (including suture needles!)

Non-Allergenic

- When exposed to oxygen, a microstructured stable oxide surface is formed that is bactericidal as well as non-allergenic

Blade Breakers

Swiss Model Blade Breaker and Holder

spherical tip, used to break disposable blades after use to prevent reuse

MPT 970 12cm

Castroviejo Blade Breaker and Holder

with sliding lock, used to break disposable blades after use to prevent reuse

MPT 971-1 9cm
MPT 971-2 12cm

Calipers

Castroviejo Caliper

used for making imprints on sclera, 20mm spread

MPT 804-1 Curved
MPT 804-2 Straight

Curettes and Spoons

Meyerhoffer Chalazion Curette

flat handle, straight shaft

MPT 754-1 Size 0, 1.50mm

MPT 906

Pierse Type Micro Forceps

the tips have an opposing flat surface, which causes less trauma

MPT 908-1 0.2mm

MPT 908-2 1.5mm

Universal Lens Inserting Forceps

ideal for silicone and acrylic foldable IOLs, box model smooth and curved jaws with rounded edges grip the lens gently and firmly

MPT 914

Faulkner Lens Holding Forceps

with smooth and polished jaws, used to pick up foldable IOL from case without marking or damaging the lens

MPT 895

Buratto Lasik Flap Forceps

serrated and abrasive blasted inner tip

MPT 903

Utrata Capsulorhexis Forceps

very delicate grasping tips, and extremely thin 11mm long straight shanks, with guide pin

MPT 905

Masket Capsulorhexis Forceps

iris stop platform, 8.5mm tip, curved shanks, with guide pin

MPT 905B

Jaffe Capsulorhexis Forceps

very delicate round grasping tips, extremely thin 11mm long shanks

MPT 905D

Pierse Corneal Forceps

0.1mm diameter, straight, delicate, 115mm length

MPT 907

Universal Lens Folding Forceps

designed to fold the lens at right angle and implant it into the capsular bag

MPT 913

Handles

Bard-Parker Handle

a metal handle with a patent form of attachment for blades

MPT 773-1 Flat Handle, #3

MPT 773-2 Round Handle, #9

Chuck Handle

for holding micro blades

MPT 782-1 7.5cm

MPT 782-2 10cm

Hooks and Nucleus Manipulators

Barrett Duo Axe with Mushroom Rotator

designed to produce a quick vertical crack of the nucleus during phacoemulsification

MPT 731C

Osher Y Hook No Hole Lens Manipulator

primarily used for capturing haptics and centering the lens, tip width 0.6mm

MPT 736A

Kuglen Iris Hook and Lens Manipulator

push and pull model, tip width 0.80mm

MPT 737-1 Angled

MPT 737-2 Straight

Sinsky II Lens Manipulating Hook

used for dialing the haptic into the capsular bag

MPT 738-1 Angled

MPT 738-2 Straight

Fenzl Lens Manipulating Hook

blunt tip, 0.15mm diameter

MPT 739

Jameson Muscle Hook

used for retrieving the rectus muscles at their insertion sites

MPT 744

Graefe Muscle Hook

used for isolating the belly of inferior oblique, overall length 131mm

MPT 745

Gass Retinal Detachment Hook

flattened 13mm "Graefe type" hook with 1.5mm oval hole

MPT 745B

Tennant Nucleus Manipulator

features a .37mm ball shaped tip for rotation

MPT 777A

Bechert Nucleus Rotator

blunt forked tip, angle to tip 7mm, tip width 0.7mm

MPT 736

Jaffe-Bechert Nucleus Rotator

blunt forked tip, angle to tip 9mm, tip width 0.70mm

MPT 736B

Kuglen Iris Hook and Lens Manipulator

clover leaf model

MPT 737A

Lewicky Lens Manipulating Hook

blunt tip, 0.15mm diameter, 10mm angled tip

MPT 738A

Smith Expressor Hook

11.5mm hook, flat handle

MPT 743

Green Muscle Hook

2mm tip width, overall length 127mm

MPT 744A

Stevens Tenotomy Hook

12.7cm, 5mm hook

MPT 745A

Akahoshi Nucleus Sustainer

a companion instrument for Akahoshi Phaco Prechopper

MPT 777

Lasik Instruments

Katzen Lasik Flap Unzipper

double-ended, combines a modified Sinsky Hook and a bi-convex spatula with beveled notches

MPT 781

Lens Loops and Dividers

Kirby Hook & Lens Loop

hook is used to put pressure on the lens, the loop is placed on the anterior chamber to "catch" the lens

MPT 743B

Wilder Lens Loop

13.3cm, 5.5 x 8mm loop

MPT 751

Kansas Lens Loop

3mm wide, serrated for small incision nucleus fragment removal

MPT 751A

Lewis Lens Loop

smooth loop

MPT 752-1 Small - 5 x 6mm

MPT 752-2 Large - 6 x 7mm

Needle Holders

Castroviejo Needle Holder Standard Jaws

standard jaws, ideal for 4-0 to 7-0 sutures

MPT 956-1 Curved with Lock

MPT 956-2 Curved without Lock

MPT 956-3 Straight with Lock

MPT 956-4 Straight without lock

Castroviejo Needle Holder Delicate Jaws

delicate jaws, ideal for 7-0 to 9-0 sutures

MPT 957-1 Curved with Lock

MPT 957-2 Curved without Lock

MPT 957-3 Straight with Lock

MPT 957-4 Straight without Lock

McPherson Needle Holder Very Delicate Jaws

very delicate jaws

MPT 959-1 Curved with Lock

MPT 959-2 Curved without Lock

MPT 959-3 Straight with Lock

MPT 959-4 Straight without Lock

Barraquer Needle Holder Very Delicate Jaws

commonly used in the suturing of skin and for strabismus, very delicate jaws, ideal for 8-0 to 11-0 sutures

MPT 963-1 Curved with Lock

MPT 963-2 Curved without Lock

MPT 963-3 Straight with Lock

MPT 963-4 Straight without Lock

Barraquer Needle Holder Short Very Delicate Jaws

short model, very delicate jaws

MPT 964-1 Curved with Lock

MPT 964-2 Curved without Lock

Barraquer Needle Holder Short Micro Jaws

short model with micro jaws, ideal for 10-0 to 11-0 sutures

MPT 965-1 Micro with Lock

MPT 965-2 Micro without Lock

Barraquer Needle Holder Extra Delicate Micro Jaws

extra delicate micro jaws, ideal for 10-0 to 11-0 sutures

MPT 966-1 Micro with Lock

MPT 966-2 Micro without Lock

Nucleus Choppers

Agarwal Phaco Chopper

double-ended, full cutting edge and Y rotator

MPT 731B

Chang Combination Chopper

this double-ended instrument features micro finger and pointed "quick chop" tip

MPT 731D

Nagahara Karate Chopper

tip length 1.5mm, spear-shaped for ease of insertion into the nucleus

MPT 731E

Rosen Phaco Splitter

0.25mm blunt polished tip

MPT 733-1 1mm cutting edge

MPT 733-2 1.5mm cutting edge

Scissors

Micro Iris Scissors

delicate and pointed tips, ring handle, 3.5" length

MPT 931-1 Curved

MPT 931-2 Straight

Vannas Capsulotomy Scissors

small and slender spring-open scissors for intraocular maneuvers, has two wings to operate it: one sharp and one blunt blade

MPT 933-1 Curved

MPT 933-2 Straight

Vannas Capsulotomy Scissors

small and slender spring-open scissors for intraocular maneuvers, has two wings to operate it: one sharp and one blunt blade

MPT 934 11mm Blades

Stern-Gills Capsulotomy Scissors

extra thin 10mm long blades

MPT 936

Westcott Tenotomy Scissors

curved and blunt tips allow easy dissection of the Tenon's capsule from the sclera with little risk of perforating the scleral wall

MPT 938-1 Left

MPT 938-2 Right

McPherson-Westcott Stitch Scissors

very sharp and pointed tips, small blades

MPT 939

Castroviejo Keratoplasty Scissors

angled to side blunt tips, small blades

MPT 940

Castroviejo Corneal Scissors

spring-open scissors used to cut the external side of the cornea, fine sutures, iris, etc.

MPT 941-1 11mm Small Blades

MPT 941-2 16mm Medium Blades

Castroviejo Micro Corneal Scissors

curved and pointed tips, small blades, 12mm blade length

MPT 942

Castroviejo Corneoscleral Scissors

curved, small blades

MPT 943-1 Left

MPT 943-2 Right

Spatulas

Castroviejo Cyclodialysis Spatula

double-ended, serrated handle
 MPT 750-1 0.25mm
 MPT 750-2 0.5mm

Barraquer Iris Spatula

used for repositioning an iris that has prolapsed through a wound, round handle, smooth, angled
 MPT 758B

Green Spatula

double-ended, long handle
 MPT 760

Culler Iris Spatula

used for repositioning an iris that has prolapsed through a wound, 1mm blade
 MPT 758A

Troutman Barraquer Iris Spatula

used for repositioning an iris that has prolapsed through a wound, 15mm angled tip, tip width 0.5mm
 MPT 758C

Fukasaku Lasik Spatula

for lifting and dissecting the corneal flap
 MPT 780

Specula

Barraquer Wire Speculum with Fenestrated Blades

the most widely used speculum for cataract extraction especially during phacoemulsification

MPT 704-1 Child (10mm)
 MPT 704-2 Adult (15mm)

Kratz-Barraquer Wire Speculum

open blades

MPT 705A-1 Child (13mm standard wire)
 MPT 705A2 Adult (15mm standard wire)

Lieberman-Tennant Eye Speculum

open blades for temporal placement, adjustable mechanism
 MPT 714

Lieberman Eye Speculum

solid blade for temporal placement, adjustable mechanism, non-reflective finish
 MPT 715

Foreign Body Removal Kits & Algerbrushes

Standard Foreign Body Removal Kit

7 instruments

MP 2205

1. MP 707A – Schocket Scleral Depressor
or
MP 721A – Desmarres Lid Retractor Double-Ended, 9mm/13mm
2. MP 769B – Castroviejo Lacrimal Dilator - Double-Ended, Fine Tips
3. MP 799G – Golf Club Spud
4. MP 864-3 – Jewelers' Forceps #3C
5. MP 995-3 – Lacrimal Cannula 19g - Straight 2 Wall
or
MP 995-5 – Lacrimal Cannula 23g - Straight
6. MP 1025 – Plastic Sterilization Tray w/ Silicone Mat (4700 model - 4.0" x 7.5" x 0.75")
7. MP 5000 – Algerbrush II Rust Ring Remover w/ 0.5mm Burr

Deluxe Foreign Body Removal Kit

11 instruments

MP 2206

1. MP 704-1 – Barraquer Wire Speculum – Child
2. MP 704-2 – Barraquer Wire Speculum – Adult
3. MP 707A – Schocket Scleral Depressor
4. MP 721A – Desmarres Lid Retractor Double- Ended 9/13mm
5. MP 769B – Castroviejo Lacrimal Dilator - Double-Ended, Fine Tips
6. MP 799G – Golf Club Spud
7. MP 864-3 – Jewelers' Forceps #3C
8. MP 879A – Douglas Cilia Forceps
9. MP 995-3 – Lacrimal Cannula 19g - Straight 2 Wall
or
MP 995-5 – Lacrimal Cannula 23g - Straight
10. MP 1025 – Plastic Sterilization Tray w/ Silicone Mat (4700 model - 4.0" x 7.5" x 0.75")
11. MP 5000 – Algerbrush II Rust Ring Remover w/ 0.5mm Burr

Algerbrush II

used for removing foreign bodies and rust

MP 5000

(Note: 1.0mm Burr available at additional charge)

*Call us today for student pricing.

Instrument Sets

Cataract Set - Phacoemulsification

MP 1060

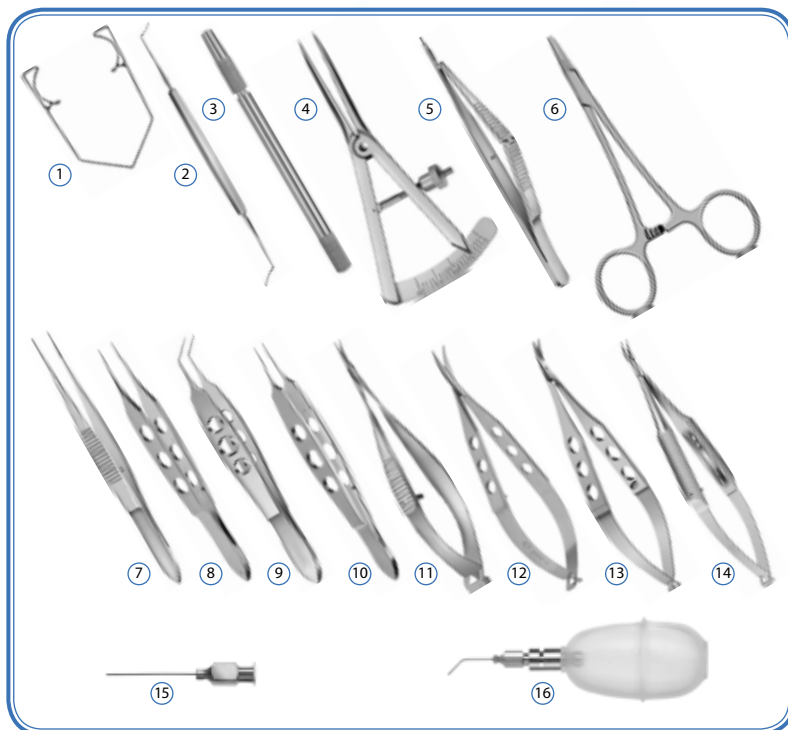

1. MP 705A-2 Kratz-Barraquer Wire Speculum - Adult
2. MP 714 Lieberman-Tennant Eye Speculum
3. MP 737-1 Kuglen Iris Hook and Lens Manipulator - Angled
4. MP 738-1 Sinsky II Lens Manipulating Hook - Angled
5. MP 765 Fine-Thornton Swivel Fixation Ring
6. MP 804-2 Castroviejo Caliper - Straight
7. MP 844 Baby Jones Towel Clamp Forceps
8. MP 845-2 Serrefine Forceps - Straight
9. MP 862-1 Kelman-MacPherson Forceps - Smooth Jaws
10. MP 863-1 Tennant Tying Forceps - Curved
11. MP 863-2 Tennant Tying Forceps - Straight
12. MP 871 Colibri Iris Forceps
13. MP 872B-1 Castroviejo Corneal Suturing Forceps - 0.12mm
14. MP 905 Utrata Capsulorhexis Forceps
15. MP 911-1 McPherson Bipolar Forceps - Angled
16. MP 933-1 Vannas Capsulotomy Scissors - Curved
17. MP 938-2 Westcott Tenotomy Scissors - Right
18. MP 939 McPherson-Westcott Stitch Scissors
19. MP 956-3 Castroviejo Needle Holder - Straight with Lock
20. MP 959-1 McPherson Needle Holder - Curved with Lock
21. MP 994-2 Hydrodissection Cannula 25g
22. MP 996-4 Rycroft Air Injection Cannula 30g
23. MP 1017 Bishop Harmon Silicon Bulb Adaptor
24. MP 1022 Sterilization Box

Glaucoma Set

MP 1061

1. MP 704-2 Barraquer Wire Speculum - Adult
2. MP 750-2 Castroviejo Cyclodialysis Spatula - 0.5mm
3. MP 782-2 Chuck Handle - 10cm
4. MP 804-2 Castroviejo Caliper - Straight
5. MP 813 Kelly Descemet Punch
6. MP 841-1 Halsted Mosquito Forceps - Curved
7. MP 849-2 Eye Dressing Forceps - Straight
8. MP 852-2 Bishop-Harmon Tissue Forceps - 0.8mm
9. MP 862-1 Kelman-MacPherson Forceps - Smooth Jaws
10. MP 872B-1 Castroviejo Corneal Suturing Forceps - 0.12mm
11. MP 933-2 Vannas Capsulotomy Scissors - Straight
12. MP 938-2 Westcott Tenotomy Scissors - Right
13. MP 939 McPherson-Westcott Stitch Scissors
14. MP 963-1 Barraquer Needle Holder - Curved with Lock
15. MP 996-3 Rycroft Air Injection Cannula 27g
16. MP 1017 Bishop Harmon Silicon Bulb Adaptor

Sterilization Boxes

Sterilization Box

stainless steel sterilizing box with hinged lid designed to protect a set of ultra fine micro surgical instruments during sterilization storage and transport

A soft autoclavable silicone mat accommodates various small instruments. Pegs keep instruments in their proper place. Lid and base of case and silicone mats are perforated with round holes to facilitate rapid drainage of fluid after rinsing or steam sterilization.

MP 1021 (200mm x 110mm x 20mm)

MP 1022 (240mm x 202mm x 20mm)

Sterilization Trays

2600 Model 2.5" x 6.0" x 0.75"
(63.5mm x 152mm x 19mm)

MP 1023

2700 Model 2.5" x 7.5" x 0.75"
(63.5mm x 190mm x 19mm)

(101.6mm x 190mm x 19mm)

MP 1025

6100 Model 6.0" x 10" x 0.75"
(152mm x 254mm x 19mm)

MP 1026

6120 Model 6.0" x 10" x 1.5"
(152mm x 254mm x 38mm)

MP 1027

Sterilizers

Cox 6000 Rapid Dry Heat Sterilizer

utilizes dry heat rather than steam and pressure to sterilize. It won't corrode, dull or pit your instruments or cause them to rust, thus extending the life of every costly instrument

MP 8000

Steri-Dent Dry Heat Sterilizer

kills bacteria without moisture and will not dull sharp instruments, and can be used to dry wet packs or as a back-up sterilizer in your practice

MP 8001 Model 200 (Two Trays)

MP 8002 Model 300 (Three Trays)

Steri-Sure Dry Heat Sterilizer

automatically starts the sterilizer cycle and set the temperature at 320°F (160°C) and time at 60 minutes; the time and temperature are displayed throughout the cycle allowing the operator updated sterilization information

MP 8003 2100 (Two Trays)

MP 8004 3100 (Three Trays)

Trial Lens Sets

Trial Lens Set

Comprehensive Set of 234 Powder Coated Trial Lens with polished metal rims in leather case with the following details:

MP 2200

70 Spherical Concave Lenses: 0.12 to 20.00 Diopters (0.12 / 0.25D increments)

70 Spherical Convex Lenses: 0.12 to 20.00 Diopters (0.12 / 0.25D increments)

34 Cylindrical Concave Lenses: 0.12 to 6.00 Diopters (0.12 / 0.25D increments)

34 Cylindrical Convex lenses: 0.12 to 6.00 Diopters (0.12 / 0.25D increments)

12 Prisms: 0.5 (2), 1.0 to 10.0 in 1.0 steps

14 Accessory Lenses: RF GF BL PL(2) MR(2) FL CL(2)PH (2) SS PF Crosscylinder x0.25x0.50

Return Policy

A returned goods authorization number (RGA) must be obtained prior to returning any product(s) to MD Purchase. Returns can only be granted and authorized by obtaining an RGA number, which can be obtained by calling or emailing MD Purchase customer service. Product(s) returned without an RGA number will be returned to the customer or distributor, at our cost, with a letter of explanation. Issuance of an RGA number should not be interpreted as a final credit to your customer account. MD Purchase reserves the right to evaluate incoming returns prior to issuing any customer credit or refund. Product(s) must be returned within 30 days of purchase for a full refund (excluding shipping and handling). There will be a 20% restocking fee for products returned after 30 days but before 45 days after receipt of shipment. Product(s) must be returned in its original packaging. No returns will be accepted 45 days from receipt of shipment. The following products cannot be returned: sterile products, which have been opened or returned after the expiration date, products that do not have original packaging, products with private label, custom made products, or custom etched products.

Warranty

All MD Purchase products, except those that are custom made can be evaluated for quality, style, and craftsmanship for up to 30 days from the date of invoice. Full credit (excluding shipping and handling) will be issued for any instrument returned within 30 days of invoice date, provided the product is returned in perfect condition. All MD Purchase instruments are backed by our lifetime warranty against corrosion from the date of invoice provided all guidelines recommended for sterilizing and cleaning the instruments are met. Any instrument returned for rust will be refurbished or replaced, at the discretion of MD Purchase at no charge. All MD Purchase instruments or products are guaranteed to be free from defects in material and workmanship when used for their intended surgical purpose. Any MD Purchase instrument or product that proves defective in workmanship or material will either be repaired or replaced at the discretion of MD Purchase, without charge.

Warranty Exceptions

Warranties are void for MD Purchase instruments and products that prove defective as a result of improper care and cleaning or misuse. Instruments or products that are damaged in fire, flood, or other acts or disasters are also excluded from warranty. MD Purchase makes no other representations or warranties regarding its instruments or products, either expressed or implied. In no event shall MD Purchase be liable for any incidental, special, or exemplary damages nor loss of profits in connection with the use of MD Purchase instruments and products.

Shipments, Damages, and Shortages

MD Purchase will assume no responsibility or liability for unforeseen delays in making delivery. The customer shall inspect all items upon arrival and give written notice to MD Purchase of any claim for a shortage, non-conformance, or damage after 24 business hours from receipt of shipment. NO CONSIDERATIONS FOR THESE CONDITIONS WILL BE ACCEPTED AFTER 24 HOURS OF RECEIPT OF GOODS. MD Purchase will make every effort to ship a replacement as quickly as possible

Limitation of Liability

MD Purchase and its subsidiaries, affiliates, and distributors are not liable for potential consequences or damages that are a result of improper care, cleaning, misuse, or personal modification of any of our products that may result in death or personal injury.
